PROFESSIONAL SUMMARY

Results-driven Senior Software Engineer with 13+ years of experience specializing in JavaScript development, web performance optimization, and edge computing solutions. Proven expertise in ecommerce platforms, CDN optimization, and production troubleshooting with strong customer-facing technical communication skills. Deep knowledge of Core Web Vitals, HTTP caching strategies, and browser DevTools for real-time performance analysis and debugging.

TECHNICAL SKILLS

Programming Languages & Web Technologies: JavaScript, HTML, DOM, HTTP, CSS, TypeScript, Node.js

Edge Computing & CDN Platforms: Cloudflare Workers, Fastly Compute, Akamai EdgeWorkers, Varnish, CDNs, Reverse Proxies, HTTP Caching

Ecommerce Platforms: Shopify, Liquid, Hydrogen, Salesforce Commerce Cloud, Demandware, Headless Storefronts

Performance & Monitoring Tools: Browser DevTools, Lighthouse, Core Web Vitals, LCP, TTFB, Real User Monitoring, Production Troubleshooting

Development & Collaboration: GitHub, A/B Testing, Web Experimentation, Personalization, Customer Communication, Technical Documentation

WORK EXPERIENCE

- ChartMogul

Mar 2023 – Apr 2026

Senior Software Engineer

ChartMogul provides subscription analytics and revenue recognition solutions for SaaS businesses. Led development of high-performance web applications and customer-facing technical implementations with focus on optimization and scalability.

 - Developed and optimized JavaScript applications serving 50,000+ daily active users with sub-200ms response times using advanced HTTP caching strategies and CDN optimization
 - Implemented real-time monitoring solutions using browser DevTools and custom diagnostic tools to identify and resolve production anomalies within 15 minutes of detection
 - Built edge computing solutions using Cloudflare Workers and Fastly Compute to improve Core Web Vitals metrics, achieving 40% improvement in LCP and 35% reduction in TTFB
 - Collaborated directly with enterprise clients to troubleshoot complex technical issues, providing detailed documentation and technical guidance for implementation best practices
 - Created automated performance monitoring dashboards using Lighthouse and Real User Monitoring tools to track web performance metrics across multiple client environments
 - Designed and implemented A/B testing frameworks for personalization features, enabling data-driven optimization decisions for customer success teams

Technologies used: JavaScript, HTML, DOM, HTTP, CDNs, Cloudflare Workers, Fastly Compute, Lighthouse, GitHub, Core Web Vitals

- applications
- Built custom caching optimization solutions and CDN configurations to enhance Core Web Vitals metrics across multiple web platforms
- Collaborated with customer success teams to provide technical insights and recommendations for platform improvements and feature enhancements

Technologies used: *JavaScript, HTML, DOM, Akamai EdgeWorkers, CDNs, Lighthouse, HTTP, GitHub, Core Web Vitals*

EDUCATION

Bachelor of Degree in Computer Science

2009 – 2013

Universidad Popular del César
